

“We found the perfect spot to build our dream home...
Umm...now what?”

There are two paths to getting your “Dream Home” built. There’s the old way where you invest a lot of time, money and energy trying to manage the building process from hundreds of miles away. Suddenly, “Dream Home” starts losing its meaning.

Or there’s the StreamLine way, providing you a total design/build solution from initial sketches and budget review through construction. At StreamLine TimberWorks, we take an award-winning architect, in-house engineering, a high quality mill workshop, impeccable timber frame design and construction and put them all under one roof...*Yours.*

We manage the process. You get to keep your sanity.
